Welcome to INVOICERA

Invoicera is a holistic solution for enterprises to meet their specific business requirements.

The solution is fully customizable and integrable to bring out the desired business outcomes. It completely streamlines the accounts payable and receivables process of your enterprise.

INVOICERA FOR ENTERPRISES

Invoicera gives you a simplified platform for Electronic Document Exchange. The solution allows businesses to exchange (connect | create | share) electronic documents (invoices, purchase orders, estimates) with other businesses (B2B) and clients (B2C). It creates a mechanism for smooth business communication and supplier-vendor relationship management. This covers credit notes, recurring invoicing, expense billing, online payments and integrated time tracking.

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

DEPLOY ON SEPRATE SERVER & CUSTOMIZE

Backed by over 11 years of experience, Invoicera has a track record of providing flexible hosted solutions. This enables enterprises to host Invoicera on a separate server and send invoices (along with other electronic documents) to your suppliers/customers via a single data process flow. This does away the need to invest in additional software and resources.

A solution from Invoicera that's your own and customised to your bespoke needs. Enterprise business automation now goes to the next level with greater efficiency and economy.

Invoicera seamlessly integrates with your ERPs/Legacy Systems/and eCommerce*** Solutions.

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

WE RESPECT YOUR COMPLIANCES

So, whether you are looking for CMMI level compliance or the security of your Invoicing details, Invoicera provides an Invoicing solution, that's under your control. Invoicera's Self-Hosted Plan is aimed at enterprise users who need to extensively use and integrate Invoicera's billing features into their business. The solution allows them to fully implement any company specific regulatory requirements on the invoicing platform

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

SEEMLESS INTEGRATION POSSIBILITIES

Invoicera API provides you another way to access your Invoicera data and enables third-party and custom tools to programmatically access and interact with the Invoicera service. Invoicera API responds to requests in an XML format and is programming language-neutral; enabling you to build applications in a language you are familiar with.

The XML API enables you to interact with Invoicera programmatically via HTTPS requests:

- Develop useful add-ons
- Integrate with existing CRM/ERP E-Commerce solutions or any other application
- Custom workflow management

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

CASE STUDY

Spanish Language and Additional Tax Implementation

The client is a Spain based company that provides invoicing service. They required an invoicing solution to be sold as a service to its own clients. They wanted the client to sign-up using a subscription plan and use the online invoicing service. They required an instance of Invoicera with additional changes like Spanish language, additional taxes and related fields.

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

CASE **STUDY**

A Leading Textile Group From India

One of the leading groups in the Textile industry from India with more than half a century of experience, wanted to automate their invoicing process for seamless integration between suppliers and vendors. Additionally the client had requirements like credit invoice creation and cash invoice creation etc.

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

CASE STUDY

A Client Requiring Billing For Loyalty Management

The client required an invoicing solution for its clubs and merchants. Their existing system was falling short so the client wanted a completely automated process which Invoicera provided.

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang

CASE STUDY

A Global Travel Solutions Company

The client is an award-winning global travel resource powered by a diverse community of local experts on the ground, providing unrivaled local knowledge and unique local deals. The client has an online presence with over a 100 destinations around the globe and is headquartered in London and Marbella.

The client wanted an invoicing and billing solution to automate the process of invoicing and payments. The client provides travel services across the globe to customers and they needed to send invoices for the services used by the customers across the globe and receive payments online.

“Knowing is not enough, we must apply. Willing is not enough, we must do.”

- Johann Wolfgang
